Search by Product Name #2

Closedbarthollomew opened 2 weeks ago

barthollomew2 weeks ago

Edit

User Story (US2.1): As a user, I want to search for a product by its name, so I can quickly find what I am looking for.

Estimation: 3 points

Priority: High

Test Case:

Enter the product name in the search bar.

View the list of products matching the query.

DoD:

Display products that match the search query.

If no match is found, inform the user accordingly.

SQL Query:

SELECT * FROM products WHERE name LIKE "%search_query%";

User Story (US2.2): As a user, I want to see the most searched products, so I can be updated on trending products.

Estimation: 4 points

Priority: Medium

Test Case:

Navigate to the homepage or a dedicated "Trending" section.

View the list of most searched products.

DoD:

Display a list of products based on their search frequency.

Regularly update this list to reflect recent trends.

SQL Query (requires additional infrastructure to track search frequency):

SELECT name, COUNT(search_frequency) AS frequency FROM products GROUP BY name ORDER BY frequency DESC LIMIT 10;

Price Range Filter #4

Closedbarthollomew opened 2 weeks ago

barthollomew2 weeks ago

Edit

User Story (US4.1): As a user, I want to filter products within a certain price range, so I can find items that fit within my budget.

Estimation: 4 points

Priority: High

Test Case:

Navigate to the product list page.

Set a minimum and maximum price using sliders or input fields.

View products within the selected price range.

DoD:

Only products within the specified price range are shown.

Filter can be easily adjusted or reset.

SQL Query:

SELECT * FROM products WHERE price BETWEEN "min_price" AND "max_price";

Sort by Price #5

bartholomew opened 2 weeks ago

bartholomew 2 weeks ago

edit

User Story (US.1): As a user, I want to sort the products by price, either ascending or descending, so I can easily identify the cheapest or the most expensive products.

Estimation: 3 points

Priority: Medium

Test Case:

Navigate to the product list page.

Use a dropdown or toggle button to select the desired sorting order.

View products sorted by their prices.

DoD:

Products are correctly sorted based on user's choice.

User can easily toggle between ascending and descending order.

SQL Query for ascending:

SELECT * FROM products ORDER BY price ASC;

For descending:

SELECT * FROM products ORDER BY price DESC;

Assignees
